Might change Tally Chart to tiny basketballs instead

Symbols on bam

Banners height will change to 100(Y), and make them a little bit longer instead

Symbols on the banner will be changed. Symbols below are just references

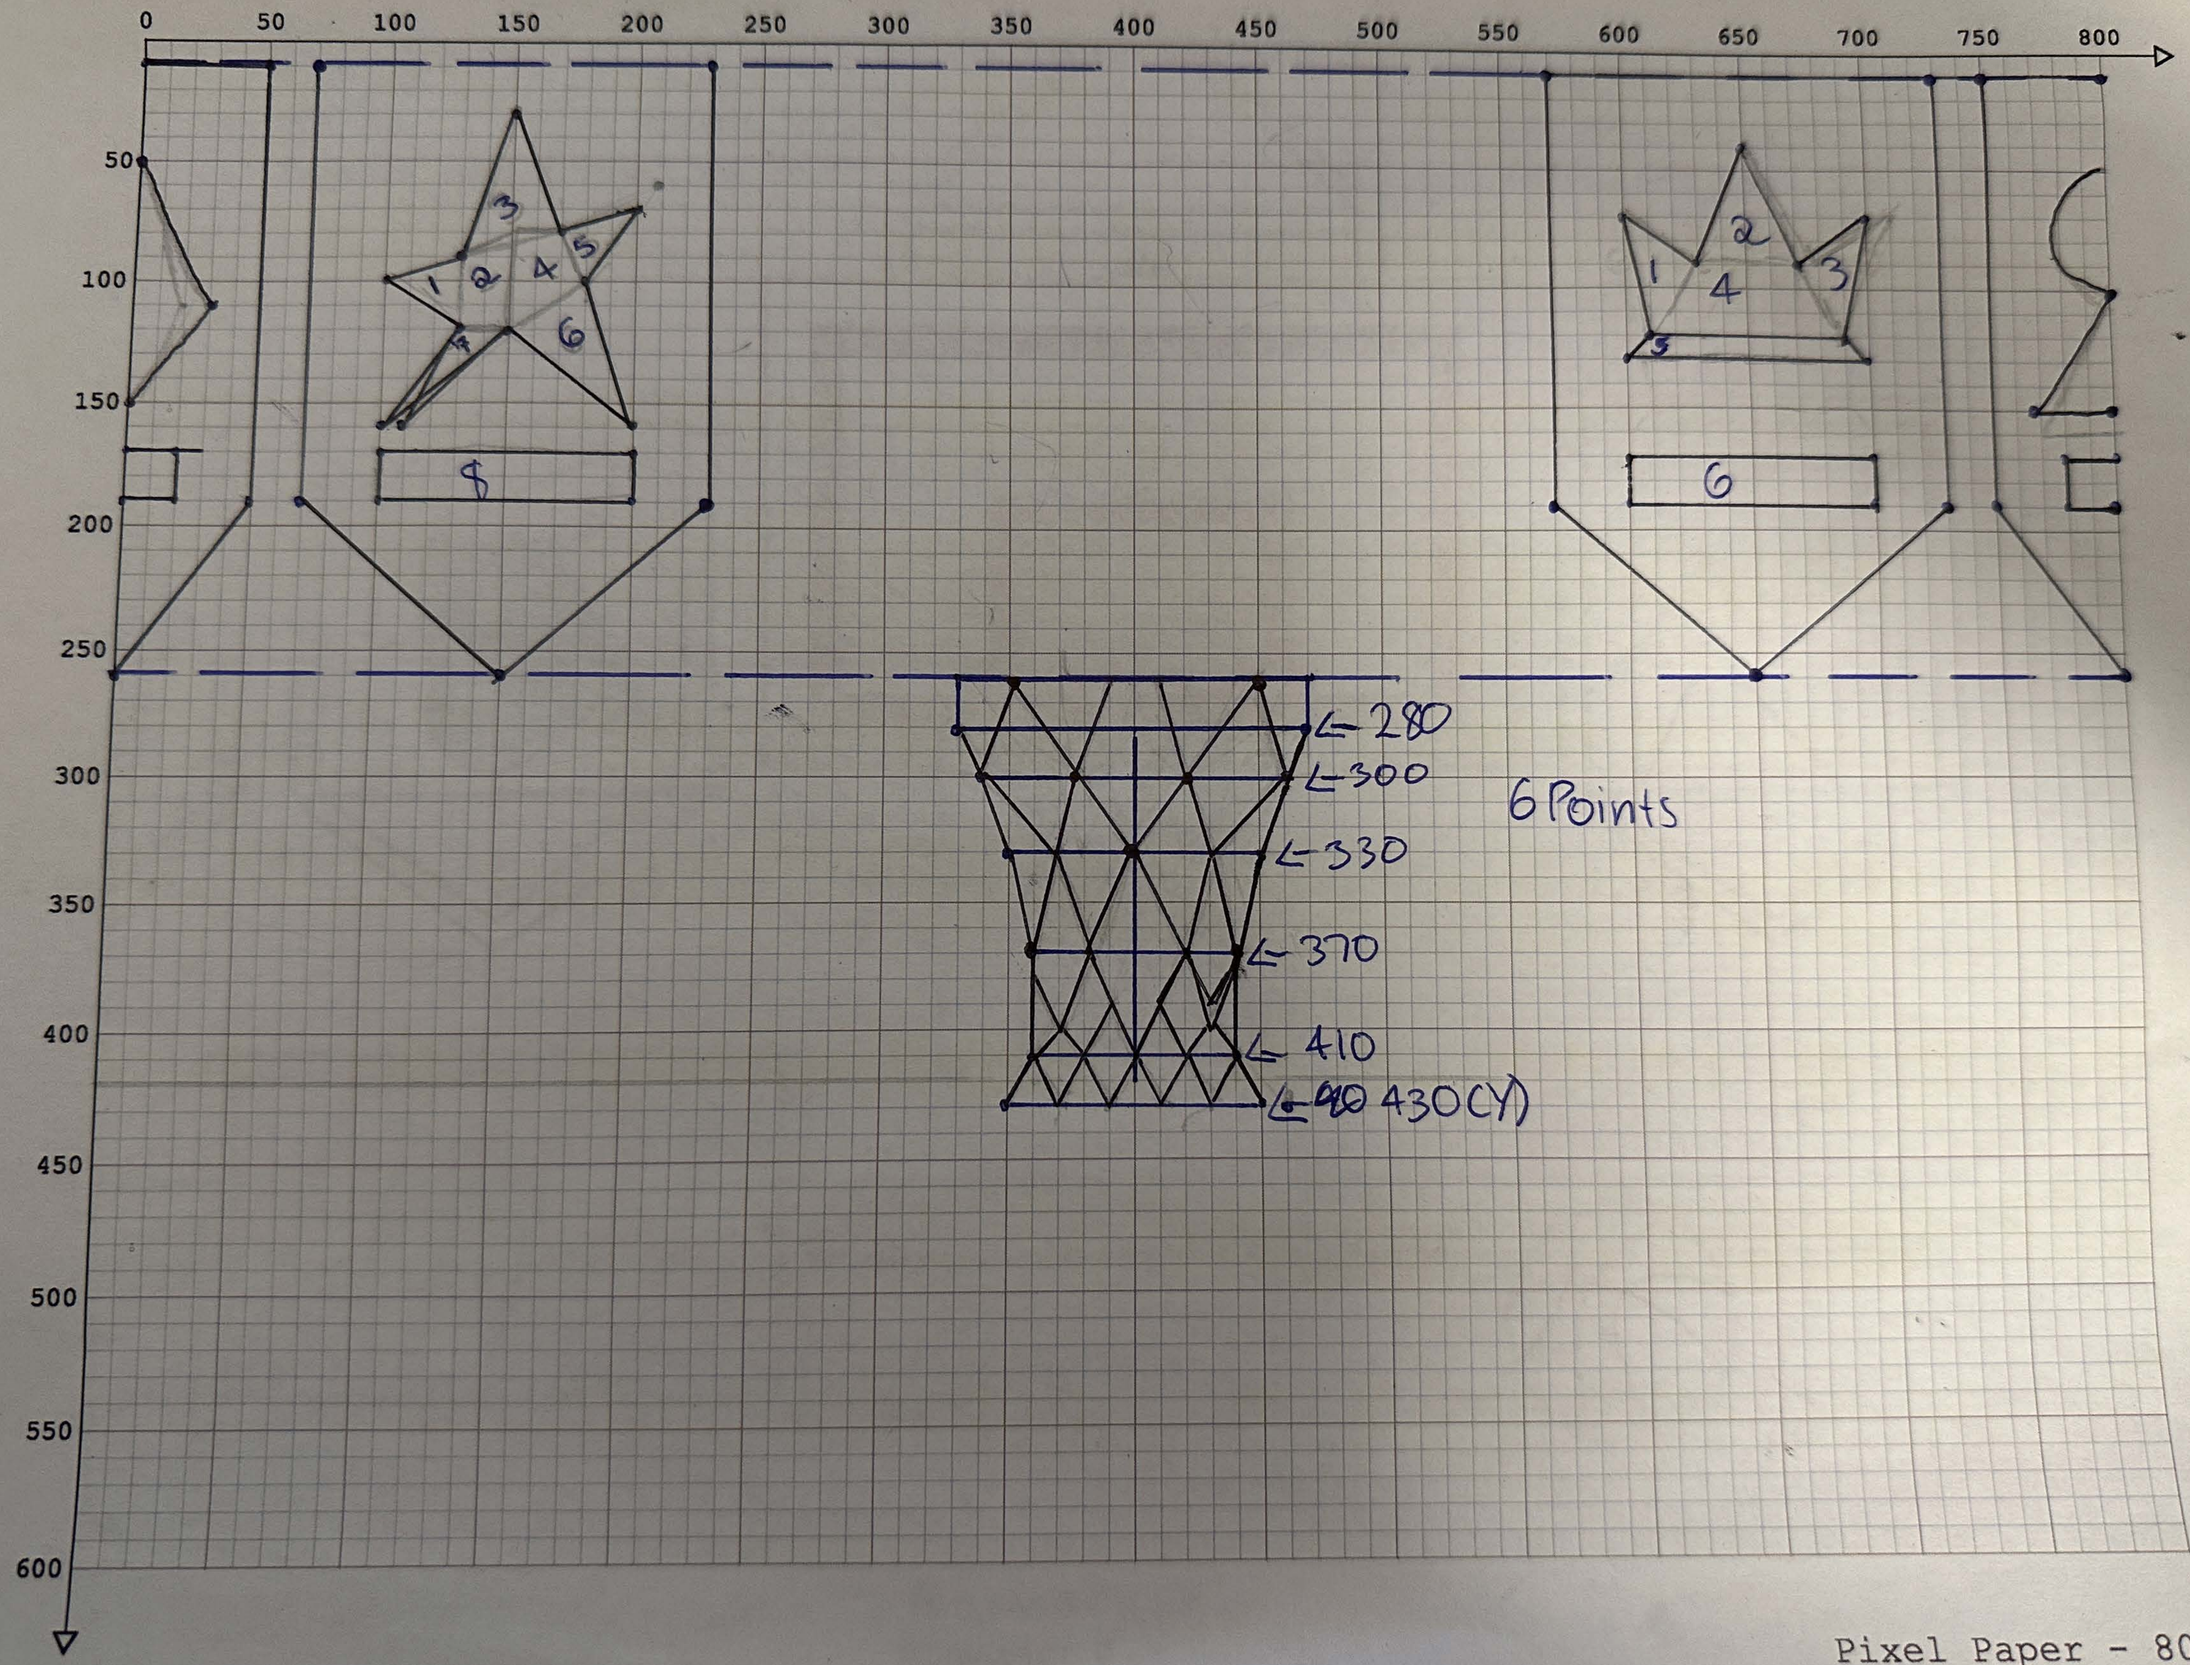

Maybe I add transparent lines for the bottom walls to make a wood-like texture?

Assignment 3 Process Work

*you need loops (duplicate objects of a single class)

*you can use raindrops as for loops)

Gaming
- Mouse, Cursor, Monitor, Folder/Game

- Lantern/Night Light/Lamp
- Knob, Lampshade, Lightbulb

Bow & arrow
- Bow, arrow, cans as the target post

Food
- Food being eaten (burger, drink

Crossy Road
- an object trying to Jaywalk across a road, lilypads, logs, water

Sorting objects
- Boxes as Loops (1) need another loop.
- ball, toys, Laptop as classes, pencils, food,
- Food container, cookie tin, apple basket, shelf

- Player, ball, goalpost

Rocketship landing on a planet
- Rocketship, meteors, planet

Plane
- plane, clouds (bg), birds,

Sports
- Basketball, ball getting into a hoop, tallychart,

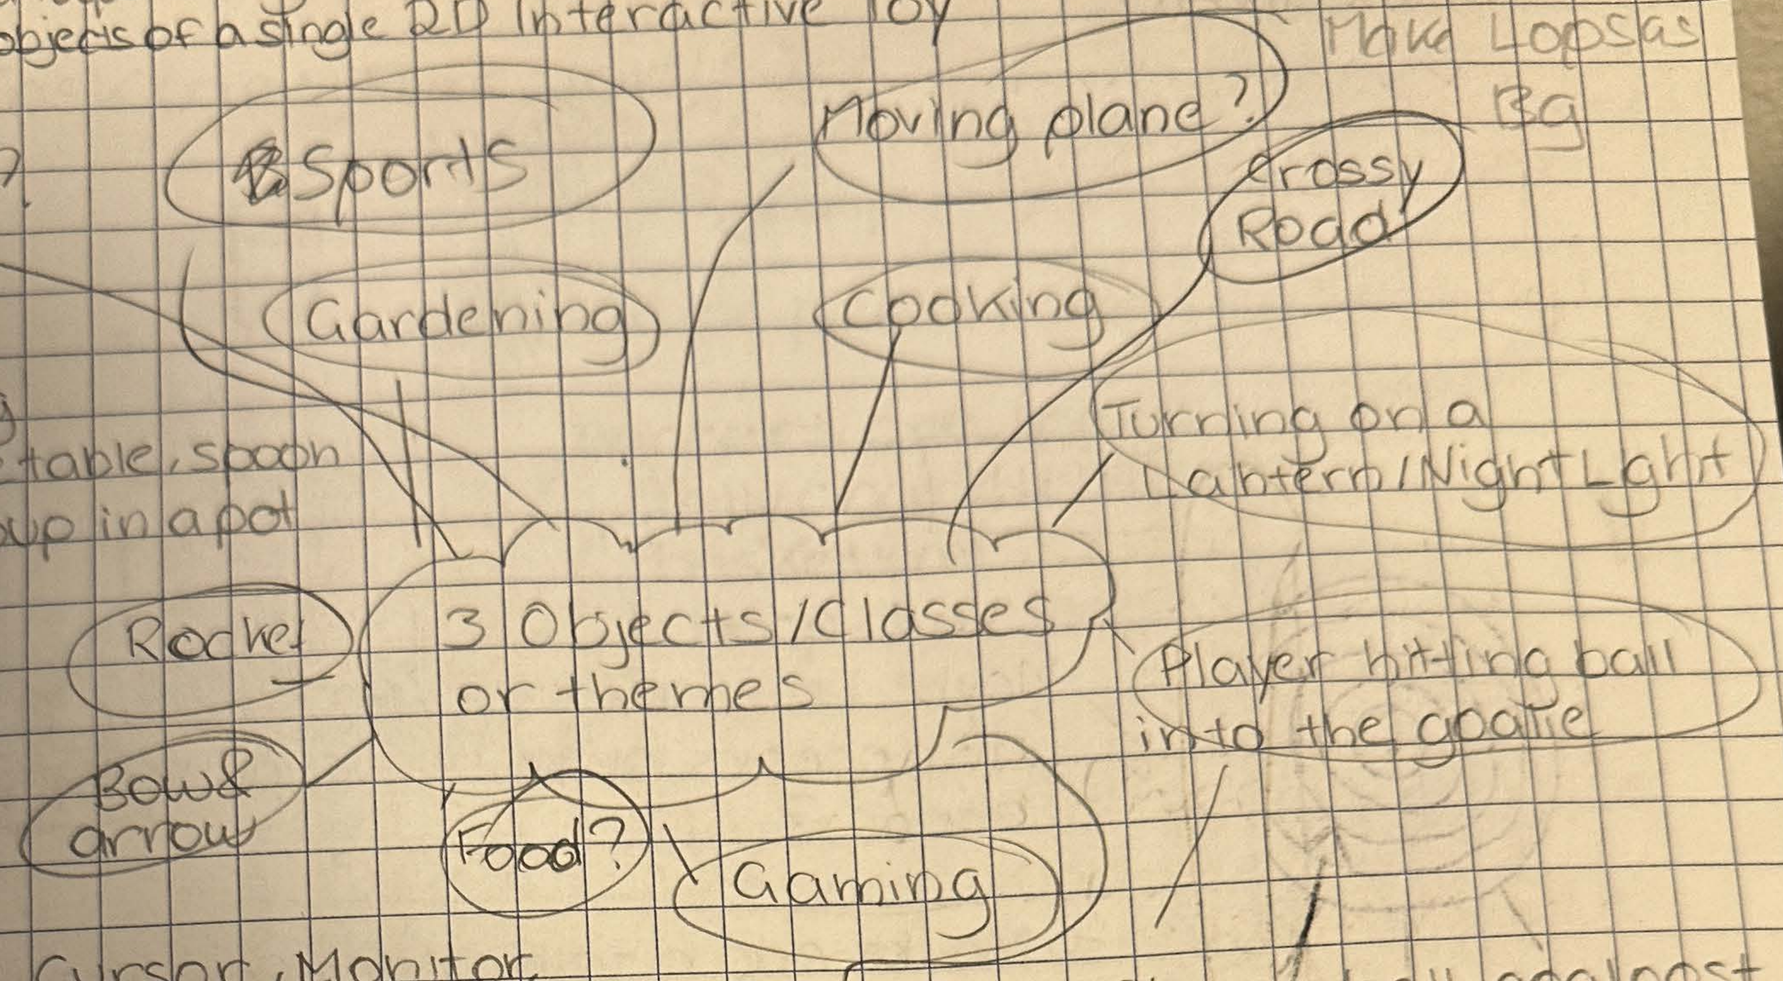

Ocean
-

IAN

Hilroy

Rough sketches

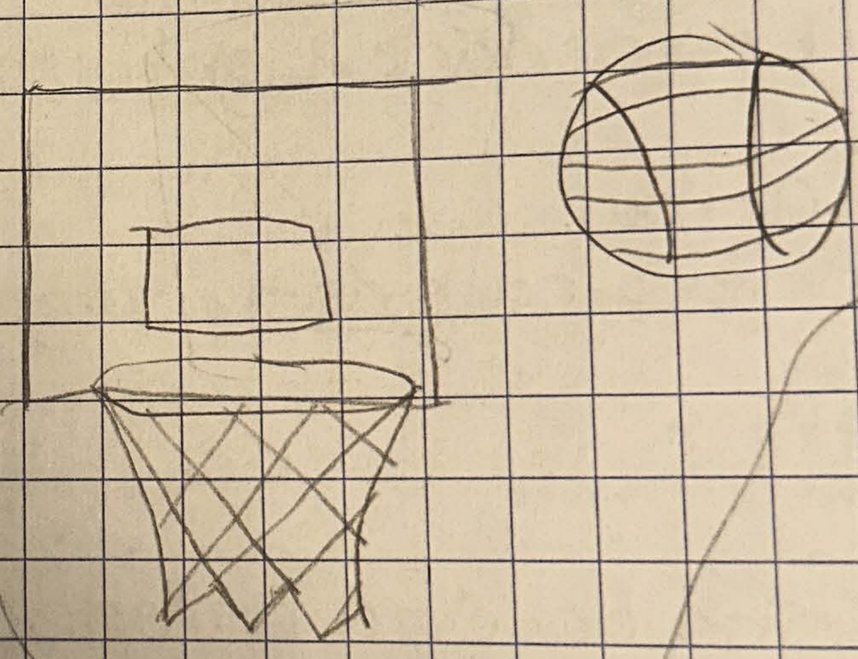

Bow & arrow

- Maybe bow moves to the side or it disappears once you've pulled the arrow?

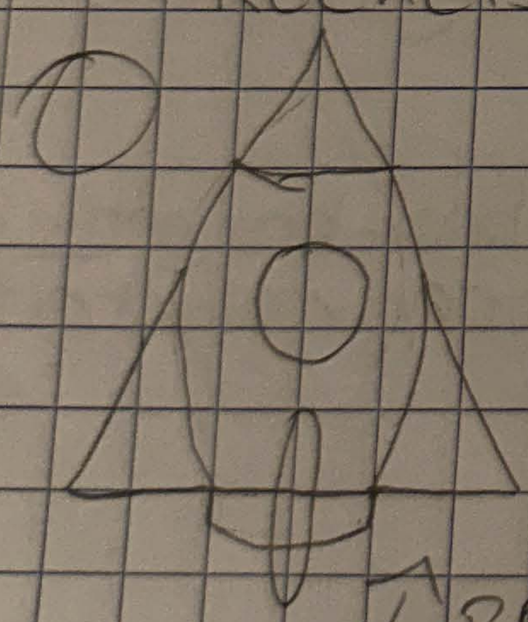

- Maybe add a tally chart for the points?

Basketball

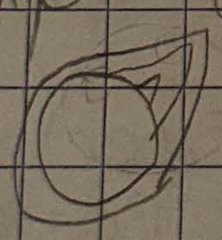

moon?

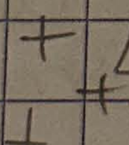

Rocketship

meteor

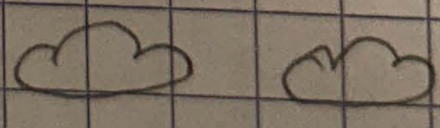

stars

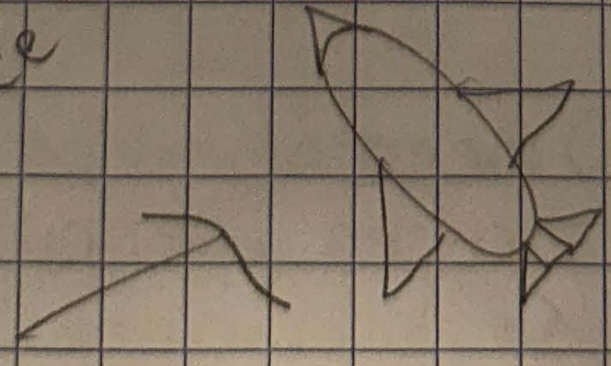

Rocket would follow mouse position as it navigates through space

meteors & stars would be For loops that keep moving down the screen randomly.

Maybe add a gradient screen that moves down as well same concept as the rocketship

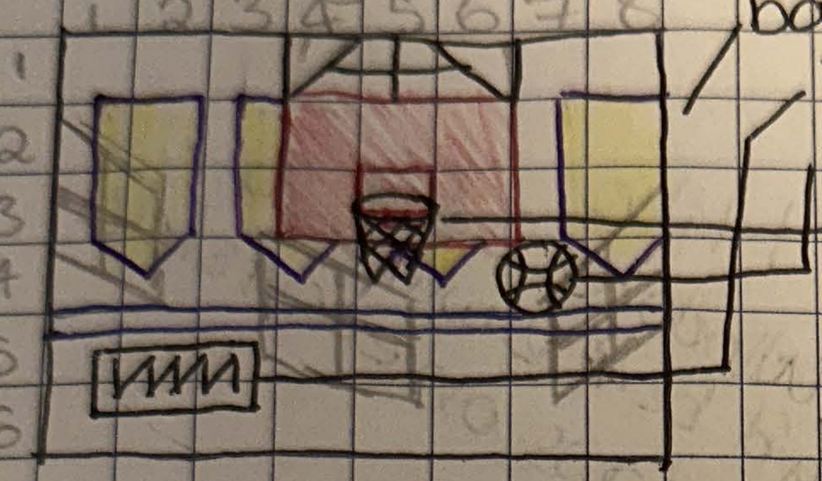

Hilroy

Do the basketball hoop idea

Taskbar: Function (4) →
Classes (3) → basketball, hoop, hand?
Loops (2) → Tally, bg of banner

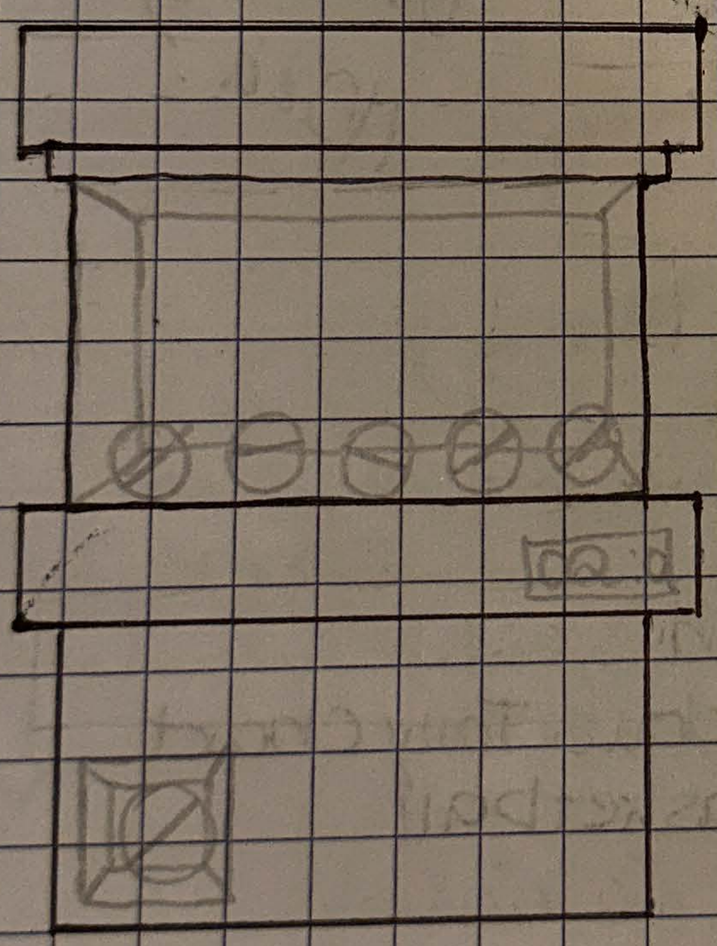

The banners would be part of the bg. Setting is in a gym

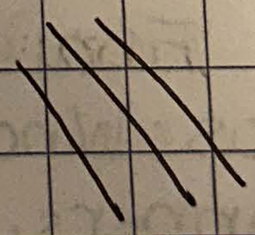

banners are loops
Tally chart is loops
basketball is class
Hoop is a class

Maybe I could add shadows as the loops and replace the banner as a class instead?

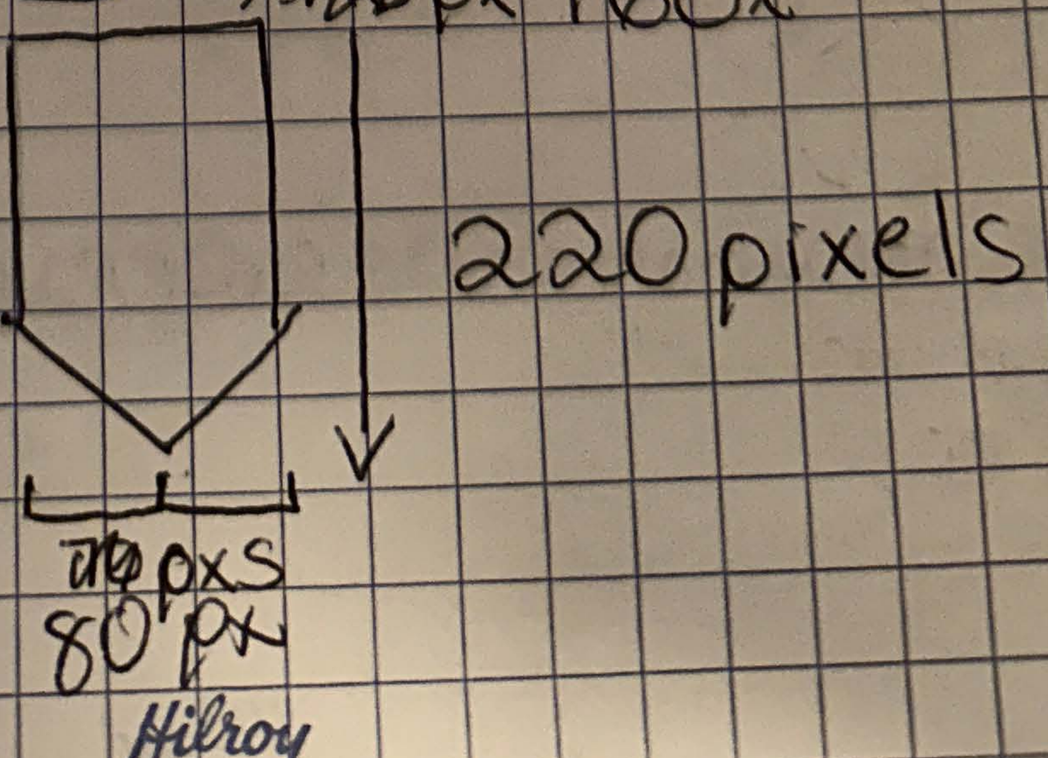

Vending Machine

Object → Claw
Object → Claw Machine
Loops → Toys
Object
Loops → bg toys

Spacebetween each banner is 15 or 10 px?
Banner Size

Hilroy

Different shadows

Window IDEA 1?

Window IDEA 2?

I like Window 2 & 3 They'd be 2 window shadows on each side

Window IDea 3?

Final Decision

For Loops: Window shadows, Tally Chart

Class: Banners, Hoop, Basketball

Functions??

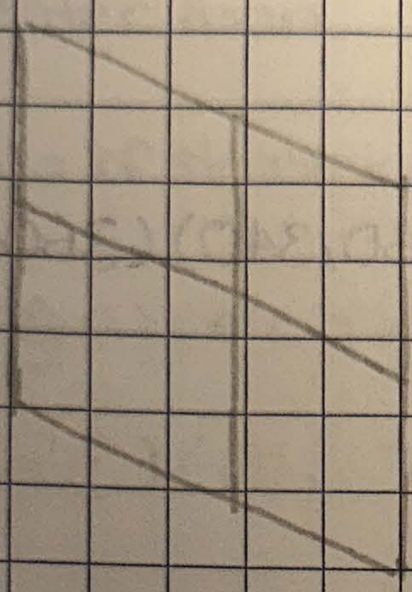

Use it on the Hoops (Encapsulation)

Hilroy

Basketball Hoop

↓ The wires that hold the hoop will be in the background. The actual Hoop will be a class Function Maybe make the hoop turn green, when a ball gets into the hoop. Maybe I could add fireworks too?

- The actual Hoop is gonna be made with arcs

Make it a Quad, then put lines over it

Colors ✓ Class

Basketball Brown B54213

Class Game —— HoopRim EE6730

Game Class —— HoopRed B23A32

Shadow 255, 229, 180, 20

~~Less Great~~

>Great <Less

x x

Right side Greater than 380, but Less than 520

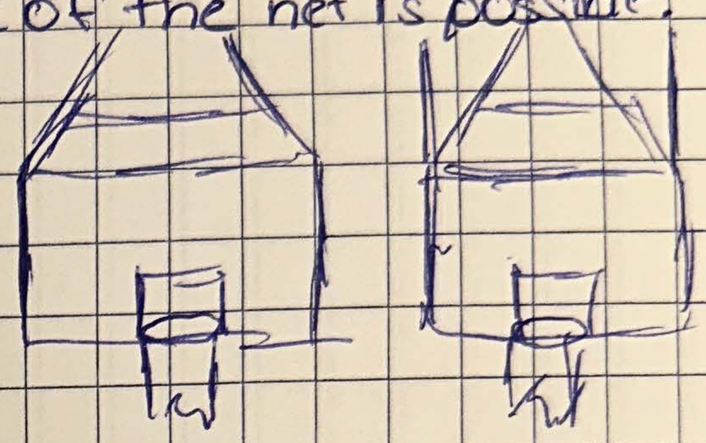

Greater than 410, but Less than 420, justscored=false

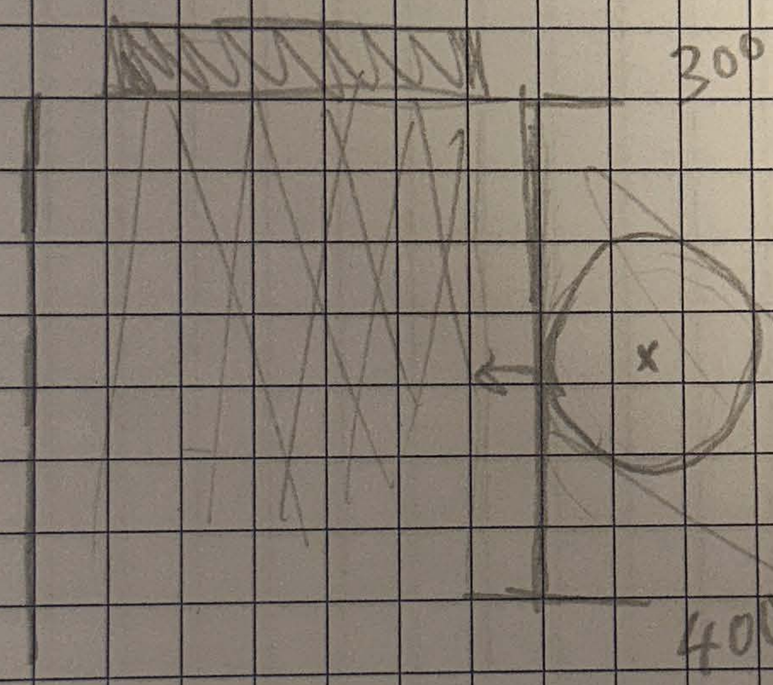

Y Y

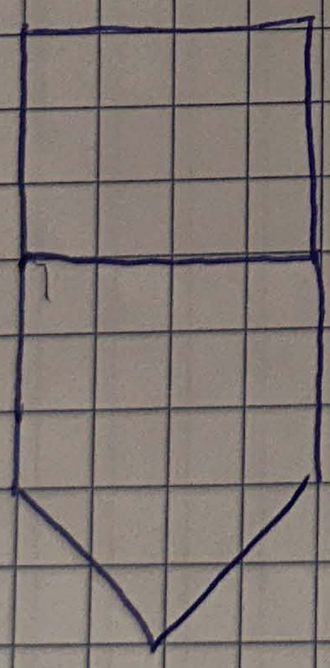

Left side Greater than

I dont think add a if statement to leftside of the net is possible.

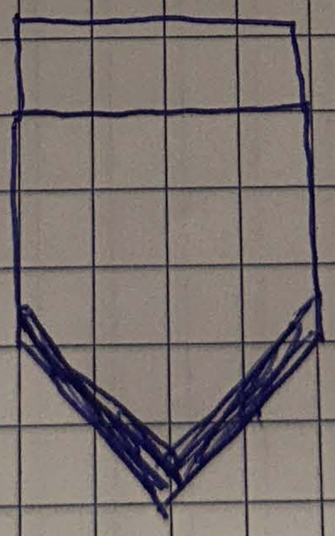

I could Try adding a brick texture

Banners should maybe be at the top of the screen instead

Draw line (x+100,430)(x+50,510

NAN
